EDUCATION

Mohandas College of Engineering and Technology Anad, Trivandrum
BTech Computer Science and Engineering — CGPA till last sem (5th Semester) : 8.07 Aug 2023 – May 2027
St. Thomas Residential School Mukkolakkal, Thiruvananthapuram
Class X: 96% — Class XII: 75% June 2009 – Mar 2023

EXPERIENCE

Intern at International Centre for Free and Open Source Solutions (ICFOSS) June - July 2026

- Worked as an intern at ICFOSS for 30 days on the project "ML Based Air Quality Device"
- Selected from a competitive pool of applicants following a technical task and interview

Presented and published a research paper at an IEEE Conference (ICCRTEE 2026) May 2026

- Presented and published the research paper, "Smartdrop- a smart domestic water management and alert system" , which combines IoT and a Node.js server in order to provide timely alerts, usage analytics and live multi-tank water level monitoring system through an Android App (Built using Kotlin). [IEEE Xplore Link](#)

Secretary at ACES (Association for Computer Science and Engineering Students) June 2025 – March 2026

- Conducted a Technical Quiz (Big-O), tech-based social outreach activity for Govt.VHSE School, Kallara, organized "Growth Conclave" event along with IEEE MCET and many more activities

Selected as prefect of St.Thomas Residential School June 2019 – March 2020

PROJECTS

S-AQS App | *IoT, ESP32, Flutter, MongoDB, InfluxDB* Nov 2025 – Feb 2026

- Developed an app which could configure the multiple communication channels (Wi-Fi, MQTT, LoRa) for the Stationary Air Quality Sensor (S-AQS) (built by ICFOSS, Thiruvananthapuram) and also monitor the AQI Data of the devices connected for each specific user
- Device was connected to and configured via Bluetooth (BLE)
- Provides multi-user and multi-device compatibility
- Built this as part of my internship tenure at ICFOSS (provided in the Experience section)

SmartDrop | *IoT, ESP32, Kotlin, MongoDB, Express.js, Node.js, Firebase Cloud Message, Git* Nov 2025 – Feb 2026

- Developed an IoT - Cloud based system for smart domestic water management and alert system which raises an alert when the water level goes from normal to low and low to critical.
- The environment consists of a HC SR-04 sensor and ESP32 which sends water level data to the backend (Node.js + Express.js). User can interact with the system through an app developed using Kotlin.
- Implemented scheduled report creation and sending it to user Telegram using a Telegram Bot and CRON Job
- SmartDrop Apk Link : [Click here to download the apk](#)

Goalify | *MongoDB, Express.js, React, Node.js, Tailwind CSS, Git* May 2025 – June 2025

- Developed a full-stack web application for managing targets by dividing an agenda into yearly, monthly, weekly and daily goals using with MERN stack and REST API.
- Implemented MongoDB Atlas, JWT Token Authorization and light mode and dark mode UI
- Goalify Link : <https://goalify-frontend.onrender.com/>

Registration site for CSE Department Events | *HTML, CSS, Javascript, Git* January 2025

- Developed a registration site for ACES (CSE Department Association) events where the user can attach screenshot of payment and all the details will be sent to the admin's Telegram
- Goalify Link : <https://aces-site.onrender.com/>

Rock-Paper-Scissors Game using Object Detection | *Python (OpenCV, YOLO)* Dec 2024 – Jan 2025

- Developed the classic game of Rock Paper Scissors but this time you play with your hand gestures against the random choices of your computer.

- Developed an object detection model using YOLO to detect hand gestures and predict with 98% accuracy whether the gesture being fed live by the webcam is Rock, Paper or Scissors.
- Repo Link : [Click here to see the repo](#)

Machine Learning Models | C#, Unity Engine

May 2024 – Aug 2024

- Academic Predictor with more than 95% accuracy (Predict grade based on certain factors like Age, Gender, Parental Education etc.) : [Repo Link](#)
- Review Sentiment Analyzer with more than 97% accuracy (Trained on IMBD reviews) : [Repo Link](#)
- Loan Predictor with more than 98% accuracy (Decision Tree Classifier to check whether a person is eligible for loan) : [Repo Link](#)

Simplistic Stopwatch App (Android and Windows) | C#, Unity Engine

May 2024 – Aug 2024

- Developed a simple stopwatch with neon light UI
- Each time you open the stopwatch app, the color of UI changes randomly and it is very visually appealing.
- APK Link (Android) : [Click here to download the apk](#)
- Repo Link (Windows) : [Click here to see the repo](#)

TECHNICAL SKILLS

Languages: Python, Java, C/C++, NoSQL (MongoDB), Kotlin, SQL(Oracle), JavaScript, HTML/CSS, C#

Frameworks: React, Node.js, Express.js, Tailwind CSS

Developer Tools: Git, Docker, Colab, Vim, JupyterNotebook, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib, scikit-learn, OpenCV
